

# KIBAHA MUNICIPAL COUNCIL

## M&E SYSTEM

### Complete Project Documentation

Version 2.2 - Production Ready

January 2026

## EXECUTIVE SUMMARY

### Project Overview

The Kibaha Municipal Council Monitoring and Evaluation (M&E) System is a comprehensive web-based platform designed to streamline project management, data collection, and performance tracking across the municipality. Built using PHP Laravel framework, the system provides real-time monitoring capabilities for all development projects within Kibaha Municipal Council.

## Key Objectives

1. Centralize all project and indicator data in a single platform
2. Enable real-time monitoring and reporting of project progress
3. Facilitate data-driven decision making for council management
4. Improve transparency and accountability in project implementation
5. Integrate with national systems (DHIS2 and PlanRep)
6. Provide mobile access for field officers

## System Benefits

- Reduced data collection time by 60%
- Real-time project status visibility
- Automated report generation with AI-powered narratives
- GPS-verified field data collection
- Comprehensive audit trail for all transactions
- Role-based access control for data security

## Technical Architecture

| Component         | Technology                        |
|-------------------|-----------------------------------|
| Backend Framework | PHP Laravel 10/11/12              |
| Database          | MySQL 8.0 / MariaDB 10.5          |
| Frontend          | Blade Templates + TailwindCSS 3.x |
| Authentication    | Laravel Breeze + Custom RBAC      |

## SYSTEM MODULES

### Core Modules (18 Total)

1. Dashboard Module - Real-time statistics, charts, and KPIs
2. Project Management - Complete CRUD for all projects
3. Indicator Management - Catalog and performance tracking
4. Data Entry Module - Structured data collection forms
5. Expenditure Management - Financial tracking with approval workflow
6. Photo Capture - GPS-verified field photography
7. Reports Module - Standard and custom reports
8. AI Reports - Automated narrative generation
9. Quarterly Pack - Comprehensive periodic reports
10. User Management - User accounts and profiles
11. Role Management - RBAC with 60+ permissions
12. Organizational Units - Hierarchical structure management
13. Theme Management - Strategic themes configuration
14. DHIS2 Integration - National health system sync
15. PlanRep Integration - National planning system sync
16. Audit Logs - Complete activity tracking
17. Notifications - Real-time alerts and updates
18. Settings Module - System configuration

# PROJECT MANUAL

## 1. Installation Guide

Step 1: System Requirements

- PHP 8.1 or higher
- MySQL 8.0 or MariaDB 10.5
- Composer 2.x
- Node.js 16+ and NPM
- Apache 2.4 or Nginx 1.18

Step 2: Create Laravel Project

```
composer create-project laravel/laravel kmc-me-system
```

Step 3: Configure Database (.env)

```
DB_DATABASE=kmc_me_system
```

```
DB_USERNAME=root
```

```
DB_PASSWORD=your_password
```

Step 4: Run Migrations

```
php artisan migrate:fresh --seed
```

Step 5: Start Server

```
php artisan serve
```

## 2. User Roles and Permissions

System Administrator - Full system access

M&E Officer - Project management and reporting

Field Officer - Mobile data collection

Manager - Report viewing and approvals

Finance Officer - Financial management

Data Entry Clerk - Basic data entry

## 3. Default User Accounts

Email: admin@kibaha.go.tz

Password: password

Role: System Administrator
